OCEANTOOLS

Innovative Products & Solutions for use in some of the world's harshest environments

OceanDISP-2 Light Activated Underwater Display Units

KEY FEATURES

1000m, 2000m, 3000m, 4000m variants

Available with red or Green LEDs

Optional integral pitch & roll sensors

Optional integral pressure sensors

Programmable 'wake-up' and 'sleep' periods

Optional battery pack

The new OceanTools OceanDISP-2 is a powerful light-activated subsea display unit based on the highly successful OceanDISP but with many new features including:

- 'Terminal' input displays ANY received serial message
- Any part of data message may be stripped out & displayed
- Data can scroll or be sequenced
- Wide operating voltage range 10 36VDC
- Standby current drain of <5mA for extended battery life
- Simultaneous RS232 and RS485 inputs
- Input Baud rates from 300 to 57600
- Fully programmable from remote PC or laptop
- Programmable "On" and "Off" times
- Two light sensors for differential, front, rear or both activation
- Programmable light sensor activation thresholds
- External TTL on/off control and TTL status output

Utilising high visibility LEDs, the OceanDISP can display data from a wide range of inputs including:

- OceanTools MiniFOG gyrocompass, OceanTILT tilt sensors or OceanTHDT sensors
- Data loggers
- Subsea pressure, temperature and flow sensors
- Wide range of third-party gyrocompasses and tilt sensors etc

The OceanDISP-2 electronics are identical in size and form factor to the original OceanDISP therefore allowing for a simple & cost-effective upgrade for existing users.
